Thanks so much for supporting my work! Over the past few years, I've made it my mission to partner with rescue organizations and promote pet adoption. By choosing my art, you're enabling me to donate time and resources to this important cause. If you would like to continue supporting this work you can do so by making a purchase in my shop, recommending my work to a friend, or simply sharing my profile on social media.

In addition to your template, you will need:

- paint brushes, and paint (in colors shown here)
- cup of water, and a paper towel for clean up
- plate or surface for color mixing (optional)

How to use this template:

Print your template using a laser/toner printer.

Using the tones on the template as a guide, choose your color based on the image provided here. Then simply paint right over the corresponding area on your canvas.

Step 1: You have 6 colors in your template. They are arranged in the order shown here. Test them out in the circles below to see how they correspond to the colors on the template image.

Step 2: Paint the first coat of each color over the corresponding areas on the canvas, working from the lightest colors to the darkest. Note that the first coat may not cover up the template image underneath, but that's OK.

Step 3: Work your way back, painting a second coat, from darkest to lightest colors. This is the time to clean up any overpainted edges.

Step 4: Add any final touches such as highlight accents around focal points. Consider adding a thin area of transition colors where two areas of lightest and darkest values meet. For a modern painterly touch, add some random splatters or stray brush strokes. Have fun!
